

Apple Pay is just another way you can use your CPM Federal Credit Union Visa Debit Card or CPM Visa credit card for everyday purchases; making in-store and in-app purchases even easier.

Let's take a look at just how simple and secure Apple Pay really is!

It's a Safer Way to Pay

Using Apple Pay is safe. When you use Apple Pay, your CPM Federal Credit Union card number is not stored on your phone or given to the merchant. A unique digital code is created specifically for that device. Your payment information is stored in Passbook®. You still enjoy all the benefits of your CPM credit and debit card, including our fraud liability policy that protects you from unauthorized purchases.

It's an Easier Way to Pay

To get started, you need an iPhone 6 or higher with iOS 8.1 or later. Simply add your CPM Federal Credit Union credit or debit card to your Apple Pay account with your iSight® camera using your Wallet app or by entering it manually under your Settings.

The first card you add will automatically become your default payment card. To avoid confusion, we encourage you to make your CPM card your default. You can go to Passbook anytime to pay with a different card and add, remove or update any of your cards as needed.

It's a Secure Way to Protect Your Account

If your mobile device is ever lost or stolen, you can use the "Find My iPhone" feature to quickly set your device in "Lost Mode," disabling purchasing ability and the ability to get into the phone without a PIN entry. Or, you can wipe all information from your iPhone.

It's a Convenient Way to Shop

You can use your CPM credit or debit card on Apple Pay to pay at more than 220,000 locations, including McDonald's[®], Macy's[®], Nike[®], Petco, Subway[®], Staples[®] and so many more! You can also use Apple Pay when using apps such as those for Apple[®], Groupon-, Panera Bread, Target, Starbucks[®] and the Disney Store[®]. Be on the lookout for more stores as they are added.
