

Take control of your account with CardNav

CPM is proud to offer the CardNav Card Control mobile app! An app that allows you to have complete control over your CPM debit cards.

The CardNav Card Control app allows you to receive real time alerts via your mobile device when specified activity occurs on your card. This allows you to immediately identify unauthorized transactions and gives you the ability to temporarily turn your card off to avoid further unauthorized charges. You will also be able to set your alert preferences for how you want to be notified and view recent transactions.

Additionally, CardNav Card Control allows you to set controls for how and when your cards are used. You can customize your card through the following categories:

- **Locations**

Limit your card to only be used in certain geographic locations you select.

Transactions attempted outside your enabled parameters will not be authorized. Stop fraud before it happens!

- **Transaction Types**

Limit your card to be used only for certain transaction types - in store, online, ATM, phone orders, etc.

- **Spend Limits**

Set a spending threshold for your card per transaction. Transactions attempted that are over your indicated spending limit will not be authorized. Great for budget control.

- **Merchant Types**

Enable your card to be used only at certain merchants - retail stores, gas stations, restaurants, etc.

And it's all for free! Download the CardNav app from [Google Play Store](#) or the [App Store](#) today!
